INSTRUCTIONS

GENERAL: Send an original copy of the application, exhibits and \$50.00 fee to U.S. Dept. of Agriculture, Consumer and Marketing Service, Grain Division, Hyattsville, Maryland 20782. Retain one copy for your files. All items on the face of the form are self-explanatory unless noted below.

ITEM

- 5 Insert the date the applicant determined that he had a new variety.
- 12a First, give the genealogy, including public and commercial varieties, lines, or clones used, and the breeding method. Second, give the details of subsequent stages of selection and multiplication. Third, indicate the type and frequency of variants during reproduction and multiplication and state how these variants may be identified. Fourth, provide evidence on stability.
- 12b First, give any special characteristics of the seed and of the plant as it passes through the seedling stage, flowering stage and the fruiting stage. Second, describe the mature plant and compare it with a similar commercial variety grown under the same conditions, and indicate the differences.
- 12c A supplemental form will be furnished by the PVPO to describe in detail a variety for each kind of seed.
- 12d Provide complete data indicative of novelty. Seed and plant specimens may be submitted and seeds submitted may be sterile. Where possible, include photographs of plant comparisons, chemical tests, etc.
- 12e Indicate whether applicant is the actual breeder, the employer of the breeder, the owner through purchase or inheritance, etc.

EXHIBIT A

12A

- (1) Original cross Early Bird and Fall Festival.
- (2) F₁ 15 inches tall, light leaved, semi-double.
F₂ emergence of dark leaved factor coupled with semi-double flowers and dwarf habit. Subsequent filial generations were selected with the invisioned characteristics of dwarfness, dark leaves, semi full double flowers.
- (3) An occasional cross-over produces under 1/10 of 1% light leaved plants. There is a range in the degree of doubleness.
- (4) Continuous family line type selection work since results of original crosses over the entire 16 years work on this item has reduced variance to that degree mentioned above, question 3.

EXHIBIT B

12B

- (1) Seedlings and young plants under greenhouse conditions have green leaves which turn dark when exposed to full sun.
- (2) Plants are approximately 15 inches tall and very similar in all characteristics to the strain known as Early Bird, a light leaved strain.
- (3) The essential difference is the dark bronzed leaved foliage.

EXHIBIT D

12D

The two photographs show the contrast and foliage coloration between the standard variety Early Bird and Redskin. Seed is identical to other Dahlias so did not include a sample but would supply on request.

EXHIBIT E

12E

Developed by the plant breeding staff of the Waller Flowerseed Company (owner).
